

Fresh Perspectives

Impressions
of the landscape
by six innovative
contemporary artists

Julie Houck

“I have been inspired by the ever-changing atmosphere on Maui during and after the sugar cane burns. The smoke rises from the fields in a ‘twist’ determined by the wind direction. Although the cane smoke is very toxic, it also has a magical quality. To me, this piece is about trying to capture that magic as well as the power of the actual burn. The fact that something so deadly is also beautiful is also part of the twist.”
